

Mounting instructions

TANK[®]M

Outside license plate holder

TTANSCTTKM37

Indian SCOUT

1) Take the two main parts to compose the arm and screw the set.

Attention, the opening to run the plate light must be at the bottom right.

4) a/ Place the light wire between the two holes in the plate holder.

b/ Slide the nuts into the slots in the arm and screw the set.

2) a/ Heat up the shrink tubing.

b/ Run the wire and screw the light to the plate holder.

5) a/ Slide the wire of the plate light into the groove provided.

b/ Screw on the plate to secure the wire.

3) Run the plate light wire through the arm into the hole provided.

6) a/ Place the plate holder on the left side of the motorbike using the original rear wheel axle.

b/ Connect the plate lighting.
